This master list of Google Hacking command sets has show up on a forum in Russia, as well as on Scribd. While we often forget about Google hacking, and rarely use it against our own sites, a list like this is going to keep the kids happy as they merrily pound their way through Google to your systems. This makes the data much more accessible than at Johnny I hack stuff.

There are some drawbacks in how Johnny I hack stuff works, you have to do a lot of clicking to get to the right hacks. This master list also includes things I have not seen or tried yet meaning that the body of knowledge for Google hacks is still being expanded upon. It has been a while since a really good Google hack has come out, but this list promises to keep me busy for a while.

Check it out, here is a copy of the master list in case you do not want to go to a hacker forum in Russia, or do not want to sign up for a scribd account (the only way to download it or cut and paste the document in Scribd is to make an account). you may also try it on Google spacile link.

Code:
